

2.5.3 IT integration and reforms in the examination procedures and processes including Continuous Internal Assessment (CIA) have brought in considerable improvement in the Examination Management System (EMS) of the Institution:

Q1M

RSCOE has implemented significant reforms in its examination procedures and processes, focusing on integrating IT solutions and refining the Continuous Internal Assessment (CIA) system.

Institute has streamlined examination scheduling through a centralized system which automates the scheduling process. Physical examination halls are also equipped with CCTV surveillance to prevent malpractices.

Processes Integrating IT for Examination Management: The EMS(eduplus) at JSPM RSCOE leverages sophisticated software that integrates various aspects of the examination process. This software manages scheduling, question paper generation, student registration, and result processing, ensuring a cohesive and efficient examination workflow. Digital mark sheets and transcripts are now available to students through online platforms. This digital approach simplifies access to academic records, facilitates faster verification by employers, and improves overall record management. e. Integrated Feedback Mechanism: The EMS (eduplus) includes an integrated feedback system that collects input from students and faculty on the examination process. RSCOE's CIA system provides a comprehensive evaluation of student performance throughout the semester. It includes a variety of assessments such as quizzes, assignments, presentations, and practical work, ensuring a well-rounded evaluation of student learning. Results from the CIA are integrated with the overall grading system. This ensures that internal assessments contribute effectively to final grades and provides a comprehensive view of student performance across various evaluation components.
